iSignage®

iQueue

Streamline Your Customer Experience

iQueue is an ideal digital queuing system. With iQueue, our clients integrate their ticketing systems with iPlays digital signage system to manage the customer flows and broadcasting their advertisement or important information at the same time at their operation areas. iQueue module equips with a physical keypad, touch screen monitor or even tablet devices.

How iQueue improves your business?

Brand Awareness ✓

Draw customers' attention and keep them engaged longer by presenting your company's professional image, leading to more sales and revenue.

Enhanced Communication ✓

With iQueue, our clients integrate their ticketing systems into their digital signage systems to manage the customer flow while displaying advertisements.

Green Technology Innovation ✓

To eliminate paper tickets, achieve paperless promotion, and meet diverse regulatory requirements for Environmental, Social, and Governance(ESG) principles.

Cost Efficiency ✓

Centralized management by updating content across multiple locations from a single platform, saving time and resources.
